Willing to relocate: Anywhere

Work Experience

Review Scrapper

PYTHON AND MACHINE LEARNING PROJECTS

October 2020 to September 2021

- Python, Jupyter Notebooks, Google Cloud Platform.
Kaggle > cloud storage > Google Colab Notebooks for faster analysis.
- Building a classification methodology to predict the quality of wafer sensors based on the given training data.

Analyst

Times Internet (Cricbuzz) - Bengaluru, Karnataka

February 2016 to July 2021

- Aided in editorial and analytics for the World's popular sports (Cricket) website and mobile application.
- Activities included bolstering user traffic by producing creative content for the live match coverage, proof-reading, organizing reports, scripting news articles and coordinating with in-house statistical teams.
- Administered Cricbuzz's social media accounts and devised strategies to engage followers on a regular-basis.
- Played a key role in the mobile application reaching 100-plus Million downloads in June 2017. Was also instrumental in the channel garnering more than 8.6 Million followers on Facebook, 4.4 Million on Twitter and 1.5 Million on Instagram.

Chatbot Project
