I am a driven, hardworking, positive, and passionate person who strives to do the best in everything I embark on. I thrive when taking on new challenges and work well in a team.

I am currently studying an online BSc in Data Science and Business Analytics through the University of London.

My goal is to join a top-grossing industry and one that I am passionate about. I have programming experience in Delphi, Python, SQL, and C#.

I am a qualified chef and worked in high-end restaurants around the country. However, I am looking to further my studies in a more evolving industry that takes big data, cloud computing, and machine learning into account. It is the future, and I would like to be a part of it. Have an analytical mind and would like to develop my skills.

I completed an IBM Professional Certificate in Data Analytics.

I have gained business experience working at our family business from a young age. From customer relations, building, and maintenance, financial and accounting; computer networks; culinary and cooking tasks; horticulture; stock logistics ... to name a few.

I know I will be a valuable asset to the team. I appreciate your consideration.
