I am an aspiring data scientist who enjoys connecting the dots: be it ideas from different disciplines, people from different teams, or applications from different industries. I have strong technical skills and an academic background in engineering, statistics, and machine learning.

My passion lies in solving business problems with tailored data and algorithms and communicating complex ideas to non-technical stakeholders. I am able to jump across verticals to deliver high-performing AI solutions.

Recently graduated in January 2022 with my masters in data science and I am interested in data science internships, full-time data science positions, or machine learning roles. Please feel free to get in touch with me via email at gloryorekoya@gmail.com.
